SUMMARY

A motivated software engineering undergraduate with a strong interest in software development and cybersecurity. Experienced with Java, Spring Boot, Node.js, React, and databases like MySQL and MongoDB, and always eager to deepen my understanding of building secure and efficient applications. Actively seeking a challenging internship where I can apply my skills, grow through hands-on experience, and stay at the forefront of emerging technologies.

TECHNOLOGIES

Category	Technologies
Languages	Java, Python , C++, JavaScript
Frontend	React, HTML, CSS, Tailwind CSS , JavaScript
Backend	Spring Boot, Node.js, Express.js
Databases	MySQL, MongoDB, Firebase
Version Control	GitHub
Security Tools Platforms	Kali Linux (Basic), Nmap(Basic),Wireshark(Basic)

PROJECTS

Salon Appointment Booking System

[Website](#) 

Full-Stack Developer

- Developed a scalable salon booking system using a microservices architecture with Spring Boot, React, and Docker
- Built secure backend services with CRUD operations, validations, exception handling, and JWT/Keycloak authentication
- Created a responsive UI using React, Tailwind CSS, MUI, Redux, and Formik
- Integrated RabbitMQ for asynchronous communication and WebSocket for real-time notifications
- **Key Technologies: Spring Boot, Microservices, React, Keycloak, JWT, RabbitMQ, MySQL, Docker**

Power Drafter Pro

[Website](#) 

Full Stack Developer

- Built a web-based panel board design tool with a custom interactive canvas supporting drag drop, rotate, move, undo/redo
- Enabled real-time design autosave and design state persistence, allowing users to resume exactly where they left off
- Enabled PNG/PDF exports of the canvas and automated quotation generation downloadable as PDF
- Developed an admin panel to upload and manage component assets used in designs
- Enforced per-user file creation limits (up to 5 files) to control system usage
- **Key Technologies: Next.js, Tailwind CSS, Convex, TypeScript**

E-Commerce Website (MERN Stack) (Ongoing)

[Website](#) 

Full Stack Developer

- Built a full-stack E-Commerce platform with **React, Node.js, Express, and MongoDB**
- Integrated **Stripe** payment gateways for both online payment and cash on delivery
- Implemented a dynamic product catalog with filters and sorting functionality
- Developed an **admin dashboard** for product management, order tracking, and user management
- Enabled **user authentication** and secure order placements with delivery address handling
- **Key Technologies:** React, Node.js, Express, MongoDB, Stripe

ACHIEVEMENTS

IEEEExtreme 18.0 - Global Ranking: 316, Sri Lankan Ranking: 17(Out of 9000+ Teams):

- Achieved Global Rank 316 and Sri Lanka Rank 17, securing University Rank 4 among 9,000+ teams worldwide in IEEEExtreme 18.0, a 24-hour global programming competition organized by IEEE.

Red Cypher 1.0 – Capture The Flag:

- Secured 11th place in this cybersecurity-focused CTF competition, demonstrating skills in problem solving and ethical hacking.

EDUCATION & CERTIFICATIONS

Bachelor of Computer Engineering

University of Ruhuna

2022 - Present

Advanced Level

Eheliyagoda National College

2011 - 2019

EXTRACURRICULAR ACTIVITIES

Program Team Member, Haxtreme .

2022 — IEEE Student Branch University, Ruhuna

Organizing Committee Member - CareerXpo 1.0

2024 — IEEE Student Branch University of Ruhuna

INTERNSHIP

Software Engineering Intern (Backend)

SI Dynamics - Colombo, Sri Lanka

Jun 2025 – Dec 2025

- Developed a Material Tracking System with QR code integration for Sierra Waterboard using Spring Boot and SQL
- Contributed to a Hospital Information Management System by developing and delivering a dedicated back-end module
- **Key Technologies:** [e.g. Node.js, Spring Boot, MySQL...]
